Strategy Description

- The Risk Managed Gold Index (GRIN) seeks to provide tactical upside participation to the SPDR Gold Shares ETF (GLD) while limiting drawdowns and downside volatility.
- The objective of the iGRIN strategy is to opportunistically deploy risk capital to GLD when the risk –return profile of gold is favorable. The strategy also seeks to preserve capital when the risk/reward profile is unfavorable through an allocation to a risk-free asset represented by the iShares Short Treasury Bond (SHV) ETF.
